VISION

In the coin economy era, POLYCNT develops a global community platform. The goal is to establish a trust process through blockchain, make corporate profits transparent, and become the optimal platform to redistribute corporate profits resulting from this. This community is a project to create a beautiful world, and is a platform to support the safe and transparent coin economy era. In addition, we operate a community platform through the POLYCNT Foundation's own proceeds so that anyone can be free from energy and share profits through the community.

POLYCNT is a foundation that operates a hydrogen energy business. The International Energy Agency (IAE) proposes a roadmap by 2050 to achieve carbon neutrality with a zero net emission of carbon that accelerates global warming. HEAB COIN contributes to the international community by achieving carbon neutrality, and provides home, automobile, and industrial generators that produce carbon-zero, eco-friendly energy green hydrogen with self-developed future technology. It is a structure that distributes 50% of the profits generated by supplying energy-friendly products to the blockchain community platform to create a beautiful world.

The foundation generates revenue outside of the coin economy through the energy industry, and uses the proceeds as operating funds for healthy community operation. The funds are operated through the hydrogen industry, not through the self-developed HEAB COIN. Therefore, the purpose of the foundation is not to realize profits through the community platform. POLYCNT Foundation operators do not expect revenue from HEAB COIN, but generate revenue on their own to make the coin economy run smoothly. This structure further guarantees stability and reliability for HEAB COIN investors and community users.

The POLYCNT Foundation will purchase HEAB COIN from the exchange every year and distribute 50% of the net profit generated through various hydrogen projects to users through the community. HEAB COIN is mined on the community platform and used as a payment function and can be exchanged between users. You can make contracts and payments in various business fields, such as cars that run on water that will be developed on your own, hydrogen generators for home use, etc., and you can receive discounts when paying with coins.

BACKGROUND

Problems of the existing cryptocurrency market

1. Investors are prioritized over users

Currently, the cryptocurrency ecosystem is dominated by investors. Therefore, the success of a project is not determined by attracting users or promoting decentralized services, but the coin price has become a measure of success.

2. Unbalanced coin economy

Many cryptocurrency projects actually start selling coins with the goal of realizing future value and profits, regardless of whether the project is in progress. Thus, it is often possible to spot a tendency to inflate the size of the economy by providing excessive bonuses to early miners and investors. In this case, many coins are distributed to only a small number of people, and this imbalance has made it difficult to grow the ecosystem.

3. User experience issues

Although cryptocurrencies have become popular recently, it is still difficult for many people to sign up for an exchange or sign up for a wallet. As cryptocurrencies become popular, a lot of information can be easily obtained, but the problem of information asymmetry is getting worse. There is a lack of decentralized apps (Dapps) that are easy for users to use and provide quality services. While providing quality information and services to many people, it will lead to the stability and popularity of cryptocurrencies by solving the problems of security and reliability.

POLYTN SOLUTION

HEAB COIN takes advantage of the advantages of existing cryptocurrencies and at the same time proceeds with a community system building project that compensates for the aforementioned shortcomings. HEAB COIN will be provided as a reasonable reward by solving the problems of the current cryptocurrency system, allowing users to engage in stable community activities.

The goal is to prioritize users over investors and ensure stable project progress. The core of the HEAB COIN project is to allow many people to safely experience cryptocurrency and to participate in the coin economy in line with the purpose of the project.

POLYCNT PLATFORM

HEAB COMMUNITY

HEAB COMMUNITY is a community platform with a virtuous cycle structure that can exchange useful information about cryptocurrency. HEAB COMMUNITY was created to provide a space for coin users to communicate and share information about the cryptocurrency market and digital assets in the upcoming token economy. Cryptocurrency created a community on the basis that the value is maintained and increased through trust and promise between users. Therefore, to solve the problems of the existing cryptocurrency market, HEAB COIN will be used as a reward coin in the community.

That is, HEAB COMMUNITY has HEAB COIN, a participation reward point. Users can be rewarded with HEAB COIN as a reward for community activities. The rewarded HEAB COIN is for writing helpful posts to other users in the community, for healthy community activities, for recommending other users' good posts, for sharing good posts and giving opinions, etc. HEAB COMMUNITY Points awarded for correct activity overall in the activity. This HEAB COIN can be used in the POLYCNT ecosystem. Typically, it can be used to purchase hydrogen generators supplied by the POLYCNT Foundation.

HEAB COMMUNITY improves the current inefficient information accumulation and distribution process in the token economy of the block chain, and activates the token distribution of community projects through token point payment. HEAB COIN, which is paid as a community activity reward, allows HEAB COIN holders to participate more actively in the COMMUNITY project and make decisions as investors.

In addition, since the COMMUNITY activity reward is incentivized with a token called HEAB COIN, users' activities on this COMMUNITY platform will become more active. A structure is designed for mutual growth by aligning interests with token holders, the COMMUNITY project, and the POLYCNT foundation. This will ultimately lead to the growth of the entire blockchain industry, and cryptocurrencies will be recognized and used in practice as a more transparent and sound economic tool.

The POLYCNT Foundation typically builds business operation funds through the following hydrogen projects. The details of the business are as follows. Hydrogen is a non-metallic element and is the lightest element on Earth. It does not emit polluting substances even when burned, so it is important as a non-polluting energy source to replace coal and oil, and is a key element in future industries that is being used.

1. Energy business

It is the world's first technology to produce unlimited energy 24 hours a day with a technology to produce green hydrogen that can produce eco-friendly electricity. Produces and sells generators for home, automobile, and industrial use.

- Replacement of platinum catalyst generating hydrogen energy- (1,000 times price competitiveness)
- Commercialization of Green Hydrogen ENERGY (Energy reduction by 70%)
- ZERO carbon dioxide

2. Environmental business

By producing green hydrogen generator with zero carbon, drinking water, water quality improvement, green algae, and red algae can be improved by more than 98%. Hydrogen is an energy environment business that is attracting attention as a new and renewable energy field. When hydrogen energy is burned, only a very small amount of nitrogen and water are produced, and it is a clean energy that does not generate any pollutants.

3. Production of cars that run on water

The produced MoH green hydrogen can generate electricity directly through a gas turbine in the form of a compressed mixed gas, or directly input into a hydrogen fuel cell using a gas separator to produce electricity. It is going to reach you with the world's first water-powered automobile production. Unlike conventional hydrogen cars, it can be used without recharging with its own technology, and 1,860 liters of hydrogen are produced per 1 liter of water. fundamentally solve.

HEAB COIN

HEAB COIN is an Ethereum-based token and was developed in December 2021. The total issuance is 100 billion. It serves as a reward for community activities within the community. It will also be used as a token to support payments and transactions within the community.

HEAB COIN was created with the meaning of passing on a clean earth to descendants through clean hydrogen energy and biotechnology and sharing beautiful cultures around the world through a blockchain community platform to create a happy, healthy and beautiful future for mankind together.

By building a community system that takes advantage of the advantages of existing cryptocurrencies and compensates for the shortcomings, the problems of the current virtual currency system are solved, and users receive reasonable compensation as they engage in stable community activities.

HEAB COIN Features

1. HEAB COIN is not sold through ICO like many other coins. Therefore, HEAB COIN will maintain a strategy that does not damage the initial purchaser as much as coin distribution is made through the exchange without ICO, and it will be positioned as a crypto asset that provides return on investment.

2. HEAB COIN intends to provide a measure to approach real assets rather than virtual assets to solve this ecosystem. Existing cryptocurrencies are price formed by the simple market principle of buying and selling, breaking away from the concept of profit and loss, and return the profits earned by businesses to users back to users, thereby enabling a virtuous cycle of the economy. It will have the same value and will establish itself as an icon of a happy coin.

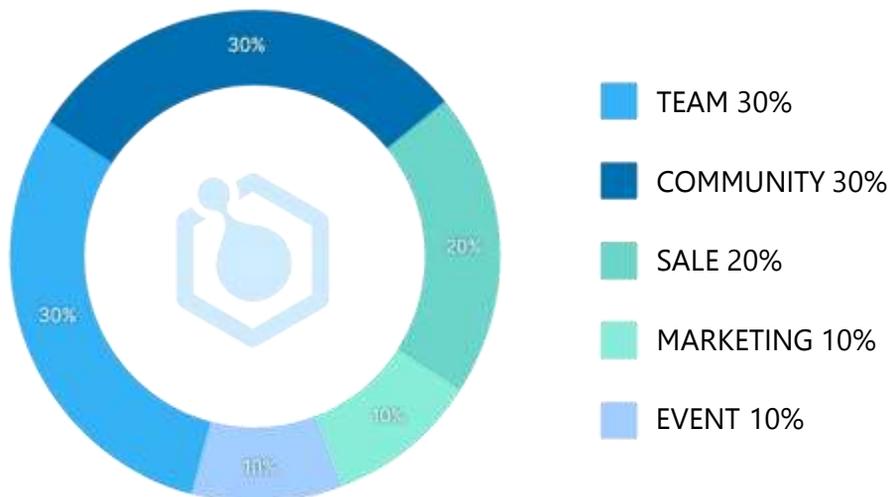

HEAB COIN

3. HEAB COIN allows users to mine coins indefinitely regardless of the amount of mining and earn profits. It is a system that develops environmental energy and distributes the profits earned through the business to the community platform. 50% of the profits earned by the foundation are repeatedly repurchased every year to repurchase HEAB COIN, and it will be paid as a mining reward to users participating in community activities. As a result, coins can be mined indefinitely, and their value increases regardless of the issuance amount, and the reward value received by users increases.

4. The strength of the HEAB COIN platform is that it is a system that meets the flow of the international community. The International Energy Agency (IAE) has presented a roadmap up to 2050 to achieve carbon neutrality (net zero) with zero net emission of carbon that accelerates global warming, and HEAB COIN is also developing an eco-friendly material called green hydrogen. This led to the mass production process, and it will supply the eco-friendly energy that the international community wants, and it will be able to play a certain role.

COIN ALLOCATION

The distribution of a total of 100 billion tokens is as follows. 30% to HEAB PLATFORM TEAM, 30% to community, 20% to SALE, 10% to marketing, and 10% to events. HEAB COIN used in the actual community can be considered infinite as the POLYCNT Foundation purchases and distributes it continuously.

HEAB COIN COMMUNITY

ECOSYSTEM

The HEAB COIN community is a platform where people around the world respect each other's human rights, exchange peacefully, and create a genuine and beautiful culture. In the future, HEAB COIN will be compatible and valuable as a payment method within the community ecosystem.

How It Works

1. The goal is for anyone to participate with a good and beautiful heart without discrimination based on national borders, religion or race.
2. The content of the platform can be shared regardless of any field, such as video, music, culture, etc., but violent or not beautiful content, abusive language, etc. will be removed, and it is a platform that is shared regardless of the age of children or adults.
3. The blockchain is transparent and safe to operate, and all participants are equally respected and coins are distributed as rewards.
4. Coins received as rewards can be sold on the exchange to earn profits, and profits are continuously rewarded through community activities.
5. The advantage of the platform is that, unlike Facebook and YouTube, it operates without advertisements, creating a new standard for participating in the community.
6. In reality, it is a platform that preserves the earth where human beings live beautifully and supplies clean energy so that mankind can live peacefully with infinite energy. do. Through this, we created a platform to connect the real and virtual so that we can get to know each other anywhere in the world and create true freedom and peace.

ROAD MAP

HEAB COIN plans to develop an optimized platform for community activity rewards and proceed according to the HEAB PLATFORM company roadmap.

2021 Year

- Organized key personnel meetup & seminar
- Business area design completed
- HEAB COIN development completed
- Listed on Elbank, an overseas cryptocurrency exchange
- Establishment of MD
- Partner company agreement (POLYCNT, ECOLGREENTECH, CNL BEST, HANSUNG BIO, CLEAN & SAFTY, RAONMEDIA, TEMPUS)

2022 Year

- Promotion of establishment of research institute
- Recruitment of talents by specialized field (Senior Doctor of Electrical Engineering, Senior Doctor of Electronics, Senior Doctor of CNT, Senior Doctor of Mechanical Equipment, Senior Doctor of Military & Aviation, Senior Doctor of Communication)
- Creating a beautiful world community platform development
- Purchase of site for Korean factory and start of construction
- Contracted with 250,000 pyeong of factory in Shenzhen, China
- Listed on the overseas cryptocurrency exchange Bittrex
- Listed on the 3rd~7th foreign cryptocurrency exchange
- Business agreement with a global media broadcasting company in New York, USA
- Conducted a program to promote corporate export to the US, China, Europe, and Southeast Asia
- Entered into a small business consulting and overseas export support community shopping mall

ROAD MAP

- Entered into a small business consulting and overseas export support community shopping mall
- Listing on the 1st to 3rd largest cryptocurrency exchange in Korea
- Applied to unlimited hydrogen energy drone, test flight test
- Production of household hydrogen water and water purifier
- Production of household hydrogen gas kitchen appliances
- 3~5KW production of unlimited hydrogen electricity for home use
- Test and production of battery-free devices for electric vehicles
- Test and production of unlimited hydrogen fuel devices to replace existing fuels for diesel, gasoline, and gas vehicles

2023 Year

- Hydrogen generator supply to domestic zero-energy project pilot complex
- Supplied hydrogen generators to zero-energy businesses such as the US, China, and India
- Unlimited hydrogen energy fuel test for ships and trains
- Worldwide unlimited hydrogen energy home and industrial generator supply

ESCAPE CLAUSE

The HEAB COIN project is carried out by the POLYCNT operating foundation, and various policies for the activation of HEAB COIN will be added. Important matters will be continuously announced on the site, and more services will be updated in the process of growing into a global payment system beyond the domestic market.

This white paper contains information about HEAB COIN. If you are unsure of your future actions, we recommend that you seek legal, financial, or other professional advice.

Legal Notice

First

This white paper was written for the purpose of reference only to provide specific information on the contents of the HEAB COIN project of POLYCNT. This white paper is provided for informational purposes only, and may be reviewed and revised due to the schedule and progress of the project and external factors.

Second

This white paper has not been prepared for the purpose of soliciting and receiving funds, and the issuance of this white paper should not be construed as an offer to purchase. In addition, the act of transmitting this white paper by a third party should not be construed as an investment proposal.

Third

Conclusions reached in this white paper are express or implied and do not guarantee the accuracy and make no warranty of any kind. This white paper does not contain any warranties of merchantability, fitness for a particular purpose, or violation of titles or laws. POLYCNT, the operating foundation of HEAB COIN, does not expressly take responsibility for any kind of damage caused by the use, reference or reliance on the information contained in this white paper.

Fourth

The contents of this white paper cannot be construed as legal, financial, accounting, tax, etc. under any circumstances. In the process of purchasing and using HEAB COIN, separate legal, financial, accounting, etc. disposition may occur according to each country's policies and laws. HEAB COIN purchasers may need separate advice on this, and the POLYCNT Operation Foundation is not responsible for these matters.

ESCAPE CLAUSE

Fifth

System construction may be delayed or other losses may occur due to unintended reasons such as system attacks from third parties, natural disasters, and force majeure. It is not free from all risks, including the decline in the value of HEAB COIN, changes in the market environment, uncertainty, political risks, and competition with competitors. Therefore, due to this, the POLYCNT project may be suspended or the direction and plan of the roadmap may be changed.

Sixth

This white paper does not represent or guarantee the accuracy of any content to you, and does not assume any legal responsibility for it. If you refer to this white paper in your decision-making actions, it is clearly stated that the results are entirely at your discretion, regardless of profit or loss. Therefore, even if any other damage such as loss or damage occurs to you by using this white paper, the POLYCNT Operation Foundation shall not be liable for compensation or other compensation.

Seventh

This white paper may be translated into other languages, but the content may not be accurately delivered in the process. The development process will also be continuously improved, and if there is a discrepancy with the content of the white paper in the process of technology introduction and implementation, the technology implementation takes precedence over the content of the white paper. In addition, certain expressions specified in this white paper contain forward-looking statements about the future, prospects, etc. of HEAB COIN business. These statements are not statements based on historical facts.

Eighth

Distribution or dissemination of all or part of this White Paper may be prohibited or restricted by the laws or regulatory requirements of any jurisdiction. If restrictions apply, you should familiarize yourself with the restrictions that may be applied by possession of this white paper. HEAB COIN and the POLYCNT operating foundation are not responsible for this.

Ninth

The information in this white paper has not been reviewed or approved by regulatory authorities. No such action has been taken in any jurisdiction. All or part of this document cannot be reproduced or distributed in jurisdictions where the HEAB COIN issuance method specified in this white paper is regulated or prohibited. The POLYCNT operating foundation is not responsible for any circumstances arising from your acceptance or reliance on all or part of this white paper.
